

**Disclaimer:**

Timber harvesting histories generated by the California Department of Forestry and Fire Protection's Northern Region Forest Practice GIS (FPGIS) show information currently in the files of CDF. This information is part of the public's domain. Because the status of timber harvesting plans (THPs) change – through operational activity and/or amendments to the original THP, and because geographic features may be reclassified or added into the data-sets over time, we recommend that you not redistribute this GIS data. If other people need this data, urge them to obtain the information directly from CDF to assure that the data is *current* and *accurate*. Further, we recommend that you update your data through CDF on a regular basis to obtain the most current and accurate version.

The State of California and the Department of Forestry and Fire Protection make no representations or warranties regarding the accuracy of data or maps. Neither the State nor the Department shall be liable under any circumstances for any direct, special, incidental, or consequential damages with respect to any claim by any user or third party on account of or arising from the use of data or maps.

Users should cite the Department of Forestry and Fire Protection as the original source of the data, but clearly denote cases where the original data have been updated, modified, or in any way altered from the original condition.

This data is not made available for sale or distribution to a third party. Users are encouraged to refer others to CDF to acquire the data, in case updated data become available.
